About Me

Mechanical Engineering graduate with hands-on experience leading multidisciplinary teams and managing end-to-end engineering projects. Skilled in project coordination, strategic planning, and delivering innovative technical solutions in dynamic environments.

Education

Diploma in Mechanical Engineering, Government Polytechnic, Rajkot	2020 – 2023
• CGPA: 8.9	
B.Tech in Mechanical Engineering, Birla Vishwakarma Mahavidhyalaya, V V Nagar	2023 – 2026
• CGPA: 6.23	

Key Projects & Leadership

Robocon 2025 (AIR 10)	2024 – 2025
• Spearheaded multidisciplinary team overseeing complete design and development of a sophisticated basketball-playing robot. • Managed sub-teams in Mechanical Design (kinematics, actuation), Electronics (sensor integration, PCB design), and Software/ML (path planning, computer vision). • Defined project scope, allocated resources, set milestones, and ensured seamless integration under tight deadlines. • Achieved All India Rank 10, demonstrating ability to lead complex technical projects to successful competition performance.	
RoboFest 4.0 - Team Lead (AIR 2 - Runner-up)	2024 – 2025
• Led team to Runner-up position in national-level robotics competition, adapting strategies effectively under pressure. • Demonstrated strong leadership and problem-solving skills in high-stakes competitive environment.	
Logistics Drone - Inventor (Design Patent Holder)	2024 – 2025
• Conceptualized and designed novel drone for logistic applications, focusing on payload efficiency and operational feasibility. • Successfully secured design patent, demonstrating entrepreneurial thinking and ability to protect innovative ideas.	
Surveillance Drone - Final Year Project	2025 – 2026
• Designed and fabricated surveillance drone using 3D printing technology and aluminum chassis for structural integrity. • Integrated advanced sensors and camera systems for real-time monitoring and data collection applications.	

Professional Experience

Student Intern, NSIC, Rajkot	3 Months
• Gained hands-on experience in operating and programming Vertical Machining Centers (VMC) and CNC machines. • Developed practical manufacturing skills and understanding of precision machining processes.	
Intern, FSM (in collaboration with IIT Delhi)	3 Months
• Applied theoretical engineering knowledge to real-world projects in collaborative research environment.	

Leadership & Additional Roles

Cultural Co-Head, Udaan 2025	2024 – 2025
• Led planning and execution of major cultural events, showcasing multitasking and people management skills.	
Mechanical Branch Representative, TRS Student Chapter, BVM	2023 – 2024
• Represented student interests and facilitated communication between peers and faculty.	

Key Achievements

- **Robocon 2025:** All India Rank 10 as Team Lead — **RoboFest 4.0:** Runner-up (AIR 2) as Team Lead
- **Innovation:** Design Patent holder for Logistic Drone
- **Versatility:** Applied knowledge across design, electronics, and software (including ML) in robotics projects

Skills & Competencies

Technical: Robotics (Design, Electronics, Basic ML), CAD/CAM (SolidWorks, AutoCAD), Manufacturing (CNC, VMC)

Leadership: Team Management, Project Planning, Strategic Decision Making, Cross-functional Coordination

Soft Skills: Communication, Problem-Solving, Adaptability, Event Organization, Time Management
